

Assignment 1

- (1) Use mongo-practice (creating new db)
 - (2) db (check in which we are working)
 - (3) db.createCollection("movie") (creating collection in db)
 - (4) db.movie.insertOne({title: "Fight Club", writer: "Chuck Palahniuk",
Year: 1999, actors: ["Brad Pitt", "Edward Norton"]})
"
- I insert many documents in collection.

- (5) db.movie.find() = find all documents.
- (6) db.movie.findOne() = find first document
- (7) db.movie.find({year: 2020}) = find all document where (year = 2020)
- (8) db.movie.find({year: { \$gte: 2020 }}) = find all document where (year >= 2020)
- (9) " " " " " \$lte: 2020 } } - - - " " (year <= 2020)

Update

```
db.movie.updateOne({title: 'KGF'},
{
  $set: { writer: "Prashnath",
    year: "2018" }
})
```

Delete

```
db.movie.deleteOne({writer: "noname"})
```
